Mailoor Road, Bidar, Karnataka INDIA-585403

Website: <https://gndecb.ac.in/>

**Title-** "Reduction Energy Consumption: Energy Saving"

**Date:** 05-04-2021

**Time of event:** 10:00 AM

**Activity Location:** Bidar

**Objective of Program:**

1. To reduce demand, protect and replenish supplies,
2. To develop and use alternative energy sources,
3. To clean up the damage from the prior energy processes.

**Importance of Energy Conservation:**

1. Energy conservation helps to reduce carbon footprint in the universe.
2. Most of the energy sources we use cannot be reused and renewed - Non renewable energy sources constitute 80% of the fuel use. It is said that our energy resources may last only for another 40 years or so.
3. We save the country a lot of money when we save energy - About 85 per cent of our crude oil needs are met from imports which costs about Rs. 8 lakh crore annually
4. Energy saved is energy generated - When we save one unit of energy, it is equivalent to 2 units of energy produced
5. Save energy to reduce pollution - Energy production and use account to large proportion of air pollution and more than 83 percent of greenhouse gas emissions

**Methods of Energy saving:**

1. If there is sufficient ventilation at home, then switch off the fans and do not use Air Conditions.
2. Switch off the lights at day time, and use lights only wherever required.
3. Make use of energy efficient lighting bulbs.
4. Use solar sources of energy.
5. Dry clothes in the sunlight rather than using electric dryers.

#### **WOMEN EMPOERMENT**

Women empowerment refers to making women powerful to make them capable of deciding for themselves. Women have suffered a lot through the years at the hands of men. In earlier centuries, they were treated as almost non-existent. As if all the rights belonged to men even something as basic as voting.

## VACCINATION DRIVE

**No of Students Participated:15**

The vaccination drive refers to the nationwide campaign to vaccinate the population against various infectious diseases, including COVID-19.

In the context of the current COVID-19 pandemic, the vaccination drive has been a top priority for governments around the world. The COVID-19 vaccines have been developed and approved for emergency use in many countries, and vaccination drives have been launched to administer the vaccines to the population.

Vaccination drives are essential to protect individuals and communities from infectious diseases. Vaccines work by introducing a weakened or inactivated form of the disease-causing pathogen into the body, which triggers an immune response that produces antibodies to fight the disease. This process enables the body to develop immunity to the disease without contracting the full-blown illness.

By understanding current situation, NSS volunteers of MBA Department, GNDEC Bidar,

1. Organized awareness campaigns: Students organized awareness campaigns to educate people about the importance of vaccination and dispel any myths or misconceptions about vaccines. This includes distributing flyers, brochures, and other informational materials in the community.
2. Conducted surveys: Students conducted surveys to assess the vaccination coverage in the community and identify any barriers to vaccination.
3. Engaged with community leaders: Students engaged with community leaders and influencers to promote vaccination and encourage people to get vaccinated. This includes working with religious leaders, community groups, and other organizations to increase awareness and promote vaccination.
