16. Best practices adopted, if any

Flip classes: Flip classes are conducted in the department to enhance student self- learning ability, where students are allowed to use online lecturers and collaborate in online discussion. The same is engaged and discussed in the regular lecture hours.

Mini Project: Students at third year are made to involve in implementing the mini projects. Students are encouraged to take up real life problems, design and implement problem statement through engineering principles.

Quiz: At the end of each module, teachers conduct quiz sessions to help students understand concepts as well as to have a first-hand assessment on students learning.

☐ **Seminars:** Students are engaged in Seminars on debates related to current syllabus topics or current industrial cutting-edge technologies, so that the slow learners are elaborated with the typical course contents.

☐ **Collaborate learning:-** An educational approach of using groups involving joint intellectual effort by students, and teachers together. It creates an opportunity to work and collaborate together to learn and grow from each other.

Case Studies: Complex course topics are elaborated and simplified by case studies. Group of students present their views and ideas on the topic by conducting the case studies.
