One Day Workshop on "IPR Learning"

Introduction:

The Department of Management Studies organized a one-day workshop on "IPR Learning" for students. The workshop aimed to provide the students with a comprehensive understanding of Intellectual Property Rights (IPR) and their significance in the business world. The workshop was conducted on 9th November 2019, and it was attended by students from various specializations.

The objectives of this Workshop were:

1. To provide an overview of Intellectual Property Rights (IPR) and their significance in the business world.
2. To familiarize students with the types of IPR, including patents, trademarks, copyrights, and trade secrets, and their legal framework.
3. To educate students on the challenges businesses face in protecting their IPR, such as infringement, piracy, and counterfeiting.
4. To provide students with an understanding of how businesses can monetize their IPR through licensing, franchising, and selling them.
5. To expose students to the role of technology transfer offices in facilitating the transfer of IPR from universities and research institutions to businesses.
6. To encourage students to appreciate the importance of IPR in innovation, creativity, and economic growth.

Overall, the objective of the workshop was to equip students with the knowledge and skills required to understand and protect IPR in the business world.

Workshop on "Intellectual Property Rights"

Introduction: The "Intellectual Property Rights" workshop was conducted to provide participants with an understanding of the different types of intellectual property and the legal framework for protecting intellectual property. The workshop aimed to help participants appreciate the importance of intellectual property in business and to equip them with the knowledge to manage and protect their intellectual property.

The objectives of the workshop were to:

1. Provide participants with an understanding of the different types of intellectual property, including patents, trademarks, copyrights, and trade secrets.
2. Help participants appreciate the importance of intellectual property in business and the need to protect it.
3. Provide participants with an overview of the legal framework for protecting intellectual property, including national and international laws and regulations.
4. Help participants understand the process of registering and enforcing intellectual property rights.
5. Provide participants with practical insights into managing and protecting intellectual property in a business context.

Workshop Content:

The workshop started with an introduction to the concept of intellectual property and its importance in business. The speaker discussed the different types of intellectual property, including patents, trademarks, copyrights, and trade secrets, and the value they add to businesses.

The workshop then covered the legal framework for protecting intellectual property, including national and international laws and regulations. The speaker discussed the process of registering and enforcing intellectual property rights, including the role of government agencies and the court system.

The workshop also provided practical insights into managing and protecting intellectual property in a business context. The speaker discussed strategies for identifying and protecting intellectual property,

PRINCIPAL
Guru Nanak Dev Engg. College
BIDAR

such as conducting patent searches, filing trademarks and copyrights, and implementing trade secret policies.

The workshop ended with a discussion on the importance of creating a culture of innovation and protecting intellectual property in a business context. The speaker encouraged participants to embrace innovation and to be proactive in managing and protecting their intellectual property.

Conclusion:

The "Intellectual Property Rights" workshop provided participants with an understanding of the different types of intellectual property, the legal framework for protecting intellectual property, and practical insights into managing and protecting intellectual property in a business context. The workshop helped participants appreciate the importance of intellectual property in business and the need to protect it. Overall, the workshop provided participants with the knowledge and skills necessary to manage and protect their intellectual property and to succeed in the competitive business environment.

Workshop on "Research Methodology"

Research methodology refers to the systematic and scientific approach adopted by researchers to conduct research studies. It involves a set of techniques, procedures, and rules that guide the entire research process, from problem formulation to the collection, analysis, and interpretation of data.

The objectives of a research methodology workshop conducted for students are:

1. To provide an understanding of the basic concepts and principles of research methodology.
2. To provide an overview of the different types of research designs and methods used in business research.
3. To provide practical knowledge of the research process, including problem formulation, research design, data collection, analysis, and interpretation.
4. To provide hands-on experience in using research tools and techniques such as statistical analysis software, survey design, and interview techniques.
5. To provide an understanding of ethical considerations in research, such as privacy, confidentiality, informed consent, and non-discrimination.
6. To develop critical thinking skills and the ability to evaluate research studies critically.
7. To provide guidance on how to write a research proposal, research report, and academic paper.
8. To provide an opportunity for students to interact with peers and faculty to discuss research ideas and receive feedback.

Overall, the objective of a research methodology workshop for students is to provide them with the skills and knowledge necessary to conduct rigorous and valid research studies in the business context, as well as to prepare them for future academic and professional pursuits.

Date:02-03-2020

Time of event:11:00 AM to 1:00PM

Event Type: Offline

IOM/Circular:

Please attach the IOM or circular related to the event.

Event Poster:

Please attach the poster of the event.

Objective of Program:

1. Educate attendees on the fundamental principles of entrepreneurship: The first objective of a seminar on entrepreneurship is to provide attendees with a thorough understanding of the fundamental principles of entrepreneurship. This may include topics such as identifying a market need, developing a business plan, raising capital, and building a strong team. The seminar should equip attendees with the tools and knowledge needed to successfully launch and grow a new venture.
2. Inspire attendees to pursue entrepreneurial opportunities: The second objective of a seminar on entrepreneurship is to inspire attendees to pursue their own entrepreneurial opportunities. This can be achieved by sharing success stories of entrepreneurs who have overcome challenges and achieved success. The seminar should also provide practical advice on how to overcome common obstacles and navigate the various stages of starting and growing a business.
3. Foster a supportive and collaborative community: The third objective of a seminar on entrepreneurship is to foster a supportive and collaborative community among attendees. This can be achieved by providing opportunities for attendees to network and connect with one another. The seminar should encourage attendees to share their own experiences, insights, and challenges, creating an environment where attendees can learn from one another and build valuable connections.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Profile of Resource person (if applicable):

Resource Person 1:

Name: Prof. Gururaj S

Designation: Asst. Prof.

Organization: CSE, GNDEC

Details of Program:

Educate attendees on the fundamental principles of entrepreneurship: To achieve this objective, the seminar should include presentations and workshops led by experienced entrepreneurs and industry experts. These sessions should cover topics such as market research, business planning, financial management, marketing, and sales. Attendees should have opportunities to ask questions, receive feedback on their business ideas, and participate in interactive exercises that simulate real-world entrepreneurial challenges. The goal is to equip attendees with practical skills and knowledge that they can apply to their own entrepreneurial endeavors.

Inspire attendees to pursue entrepreneurial opportunities: To inspire attendees, the seminar should include keynote presentations and panel discussions featuring successful entrepreneurs who have overcome challenges and achieved success in their fields. Speakers should share their personal stories, including their successes, failures, and lessons learned. They should also provide practical advice on how to overcome common obstacles and navigate the various stages of starting and growing a business. Attendees should leave the seminar feeling motivated and empowered to pursue their own entrepreneurial opportunities.

Foster a supportive and collaborative community: To foster a supportive and collaborative community, the seminar should provide opportunities for attendees to network and connect with one another. This can include structured networking sessions, informal discussions over meals and breaks, and online forums for ongoing communication and collaboration. The seminar should also encourage attendees to share their own experiences, insights, and challenges, creating an environment where attendees can learn from one another and build valuable connections. By fostering a sense of community, the seminar can help attendees build a support network that will be valuable as they pursue their entrepreneurial goals.

Program Outcome:

The outcome of the seminar on entrepreneurship would be the following:

1. Increased knowledge and skills: Attendees would leave the seminar with a deeper understanding of the fundamental principles of entrepreneurship, including market research, business planning, financial management, marketing, and sales. They would have gained practical skills and knowledge that they can apply to their own entrepreneurial endeavors.
2. Motivated and empowered attendees: Attendees would leave the seminar feeling inspired and motivated to pursue their own entrepreneurial opportunities. They would have heard from successful entrepreneurs who have overcome challenges and achieved success, and received practical advice on how to navigate the various stages of starting and growing a business. They would be equipped with the confidence and skills needed to take action on their own entrepreneurial ideas.
3. A supportive and collaborative community: The seminar would have fostered a supportive and collaborative community among attendees. Attendees would have had opportunities to network and connect with one another, share their own experiences, insights, and challenges, and build valuable connections. This community would continue to be a valuable resource as attendees pursue their entrepreneurial goals.

The outcome of the seminar would be a group of motivated and empowered entrepreneurs who have gained the knowledge, skills, and community support needed to successfully launch and grow their own ventures.

- **Name of the Faculty : Dr.Savita Soma**
- **No of students attended: 59**
- **No of Faculty attended: 16**

Program Outcome:

The seminar was well-attended and received positive feedback from participants. Attendees gained a comprehensive understanding of research methodology and acquired practical skills and knowledge that they can apply to their own research projects. The seminar was a valuable learning opportunity for individuals from various fields, including academia, business, and government.

Number of Students participated: 56

Invitation to the resource person:

Through Whatsapp.

Objective of Program:

1. IP is the protection given to inventors or creators of intellectual products with moral and commercial value. The objectives of IP law are to provide incentives to create and serve the interests of the public by promoting economic growth.

Shiv

Guru Nanak Dev Engg. College
BIDAR

2. Intellectual property refers to intangible property that results from creative mental work, such as an invention, design, idea, method, name, or symbol. The creators of such property can prevent their creations from being infringed by applying for IP rights. There are many different kinds of IP rights, each of which is granted for a certain type of creation.
3. IP law seeks to protect creators of intellectual products or services by giving them time-limited rights to decide how their creations should be used. According to the World Intellectual Property Organization.

Resource Person 1:

Name: Dr.Khaleel Hussain

Designation: ERCIM Postdoctoral Research Fellow,
Fraunhofer institute for Integrated Circuits

Organization: Germany.

Program Schedule:

Link:<https://meet.google.com/emf-eawb-mki>

Details of Program:

Introduction of intellectual property rights is a basic guide to the legal rights of individuals or organizations that own intellectual property (IP)Program Outcome:Introduction of intellectual property rights is a basic guide to the legal rights of individuals or organizations that own intellectual property (IP). Intellectual property refers to intangible property that result from creative mental work, such as an invention, design, idea, method, name, or symbol. The creators of such property can prevent their creations from being infringed by applying for IP rights. There are many different kinds of IP rights, each of which is granted for a certain type of creation.

1. Identify various types of intellectual property (IP) and what IP rights and protections exist, as well as how to use and leverage IP for commercial purposes
2. Identify the Technology Readiness Level of a new technology or research project
3. Describe the technology transfer process and understand the process and importance of de-risking a new technology or business model concept
4. Use the Business Model Canvas and Value Proposition Canvas to map out the key elements of a business plan and the value of a new product or technology

DATE: 06-01-2020 to 11-01-2020

Title- "Workshop on Engineering Research Methodology "

Date: 06-01-2020 to 11-01-2020

Time of event: 9:30 PM to 5:00 PM

Event Type: Online

IOM/Circular:

Please attach the IOM or circular related to the event.

Event Poster:

Please attach the poster of the event.

Objective of Workshop:

1. To give introduction to Engineering Research Methodology using Machine learning with python, as programming language The purpose of machine learning is to discover patterns in your data and then make predictions based on often complex findings to answer business questions, detect and analyze trends and help solve problems The Workshop should also provide practical advice on how to overcome common obstacles and navigate the various stages of starting and growing a business.
2. The objective of this workshop is on research methodology using machine learning with python language to solve real time problems faced by the researchers and customers. Introduce to research on paper writing and induce paper publication skills to find answers to the questions by applying scientific procedures. In other words, the main aim of research is to find out the truth which is hidden and has not yet been.
3. As research methodology gives research legitimacy and provides scientifically sound findings. It also provides a detailed plan that helps to keep researchers on track, making the process smooth, effective and manageable.

GURU NANAK DEV ENGINEERING COLLEGE BIDAR

Approved by AICTE New Delhi , Affiliated to VTU Belagavi, ISO Certified 9001-2015, Karnataka India

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Resource Person 1:

Name: Dr. DhananjayM

Designation: Professor

Organization: CSE, GNDEC

Details of Workshop:

Innovative: The speaker should help to solve the participants' doubts, as this Workshop will provide an opportunity for research scholars to find answers to the questions by applying scientific procedures. In other words, the main aim of research is to find out the truth which is hidden and has not yet been discovered. Although every research study has its own specific objectives, the research objectives may be broadly grouped as follows: 1.To gain familiarity with new insights into a phenomenon (i.e., formulate research studies);

2.To accurately portray the characteristics of a particular individual, group, or a situation (i.e., descriptive research studies);

3.To analyze the frequency with which something occurs (i.e., diagnostic research studies)

4.To examine the hypothesis of a causal relationship between two variables (i.e., hypothesis testing research studies).

Conceptual: The resource person will speak on the research related to some abstract machine learning ideas on theory and practical on research related topics. Ongoing empirical Research work on the other hand, exclusively relies on observation or experience with hardly any regard for theory and system. Such research is data based, which often comes up with conclusions that can be verified through experiments or observation. Empirical research is also known as an experimental or applications type of research, in which it is important to first collect the facts and their sources, and actively take steps to stimulate the production of desired information.

Inspire the participants to grab these opportunities: To inspire participants, the Workshop should include keynote presentations and panel discussions featuring successful entrepreneurs who have overcome challenges and achieved success in their fields. Speakers should share their personal stories, including their successes, failures, and lessons learned. They should also provide practical advice on how to overcome common obstacles and navigate the various stages of starting and growing a business. Participants should leave the workshop feeling motivated and empowered to pursue their own entrepreneurial opportunities.

GURU NANAK DEV ENGINEERING COLLEGE BIDAR

Approved by AICTE New Delhi , Affiliated to VTU Belagavi, ISO Certified 9001-2015, Karnataka India

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Program Outcome:

The outcome of the workshop on Research methodology with python would be the following:

1. Enhanced the knowledge on Machine learning with python The participants would leave the workshop with a deeper understanding of the fundamentals on research and paper writing of particular research, including research article publishing in reputed journals and other indexed journals. The participants have gained knowledge on empirical versus conceptual skills and knowledge that they can apply to their own programming application with python language.
2. Encouraged the Participants on quality machine learning research work: Motivated and empowered attendees: Attendees would leave the Workshop feeling inspired and motivated to gain knowledge on quality work on machine learning applications and their reputed publications, improving the participants confidence level to improve skills needed to take action on their own ideas.
3. A supportive and collaborative community: The Workshop would have fostered a supportive and collaborative community among attendees. Participants would have had opportunities to network and connect with one another, share their own experiences, insights, and challenges, and build valuable connections. This community would continue to be a valuable resource as attendees pursue their programming machine learning application goals.

The outcome of the workshop would motivate participants who have gained the knowledge on Python programming language and research support needed to successfully publish research work.
