How to Crack Public Service Commission

Introduction

One of the weak areas in public sector organisations is inadequate capacity at the operational, middle and higher levels to formulate, appraise and execute public policies, projects and programmes. Human resource development is thus a principal factor determining the achievement of an organization's objectives. Consequently, there is a pressing need for a viable training strategy to develop the workforce for effectiveness in the job environment. The strategy presented in this chapter is based on a critical review of diverse approaches to training, in order to inculcate quality and bring continuous improvement in training programs. 2.2. Strategy for Capacity Building of Human Resources of the Government of Mauritius Capacity building includes acquisition of knowledge, skills and attitudes. Another way of looking at it would be the acquisition of appropriate conceptual, technical and human skills required for different job requirements. At the apex level of an organization, this could mean the development of competencies to design and transform quality systems or in other words the capacity to design appropriate policies, programmes and schemes to attain the larger goals of the organisation. At the middle management level it may have the focus on building capacities to align human, financial and physical resources to achieve the ends of the organisation.
