Title- “Recent trends in IT industry”

Date: 25.10.2021

Time of event: 11:00 AM

Event Type: Online

Objective of Program:

1. To examine the influencing factors and implementation of choice of higher education.
2. To provide suitable suggestions on the basis of findings.
3. To help in the proper choice of courses.
4. To develop readiness for choices and changes to face need challenges

Profile of Resource person:

Name: Mr. Syed Salman

Designation: Development Team Lead

Organization: Rezler System Pvt Ltd,Bendaluru

Dhawz.
PRINCIPAL
Guru Nanak Dev Engg. College, Bidar

Details of Program:

An Expert Talk on "Recent trends in IT industry" was organized by the coordinator Prof. Ramya S.Pure of Computer Science & Engineering Department of Guru Nanak Dev Engineering College, Bidar on 25th oct 2021.

The resource person delivered the talk on "Recent trends in IT industry"

& shared his knowledge and experience.

All the students of final year attended the talk

Program Outcome:

1. Participants could get an industry exposure.
2. Participants were able to face the challenges faced by them in choosing the options for good companies.

Number of Students participated:60

Number of faculty participated:04

Event Name: Recent trends in IT industry

Carrier Guidance

Career guidance Career Guidance is the guidance given to individuals to help them acquire the knowledge, information, skills, and experience necessary to identify career options, and narrow them down to make one career decision. This career decision then results in their social, financial and emotional well-being throughout. What am I going to do after B.Tech If you are an engineering student in your seventh semester, the big question would be “What am I going to do after B.Tech?”. Every one has certain aspirations, plans and the selection of what they aspire to be in the future should be according to these emotions. This is the time when you have to decide where you want to be in the future and how you should go about it. Giving here various Career options that you can follow after completing your B.Tech.

Opportunities at pharma industries

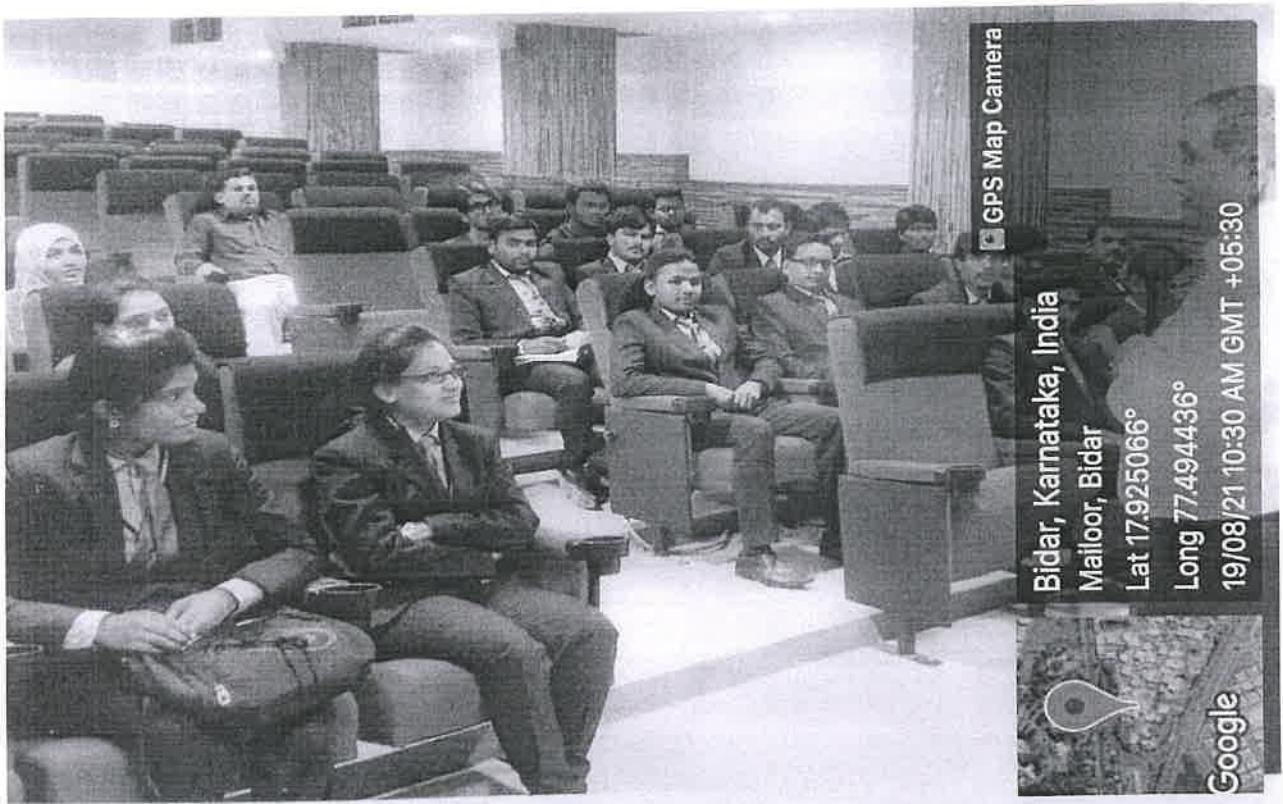

The pharmaceutical industry offers numerous opportunities for MBA students, as it is a growing industry that is constantly evolving. Here are some of the benefits of learning about the opportunities of pharma industries for MBA students:

1. Understanding the Business of Pharmaceuticals: The pharmaceutical industry is a complex industry that involves multiple stakeholders, including pharmaceutical companies, regulators, healthcare providers, and patients. By learning about the opportunities of pharma industries, MBA students can gain an understanding of the business of pharmaceuticals and the various factors that impact the industry.
2. Developing Business Strategies: The pharmaceutical industry requires businesses to develop effective strategies for drug development, manufacturing, marketing, and distribution. By learning about the opportunities of pharma industries, MBA students can develop skills in strategic planning and business development that can be applied to the pharmaceutical industry.

Engineering and construction (E&C) companies are used to cyclical downturns, but the speed and strength with which COVID-19 has struck is unprecedented. Projects are being delayed or cancelled. Supply chains are under threat. Employee and subcontractor labour health is a concern, and there are practical challenges around social distancing on construction sites. Companies that have had to furlough workers might find the future availability and skills of those workers uncertain. And because many construction and contracting companies operate without substantial capital reserves, the impact of the lockdowns could force some to restructure debt, seek new sources of capital or risk insolvency.

It is an extraordinarily difficult time, but swift yet thoughtful action can help E&C leadership teams manage the immediate crisis, stabilise supply chains and reinforce their companies' financial position to emerge from the crisis with a more solid foundation.

"Working remotely with good digital infrastructure might be easy for designers, consultants, educators and students but more difficult for large construction site workers and network maintenance operators," says Bachar. "Hence, the first priority is to improve the digital infrastructure and communication skills, followed by offsite construction and automation."

"On a positive note and on a global scale, it is enlightening to see news stories emerge of Venetian canals running clear and nitrogen dioxide levels in China lowering," says Chris. "However the ongoing corona virus pandemic will most certainly have impacted the global Net Zero agenda and pushed it down the list of priorities. We're faced with economic uncertainty but as civil engineers we should ensure that decarbonization remains a vital agenda item. When organizations bounce back let's do so with Net Zero Carbon at the forefront."

"In some projects, skilled-workers could be substituted by robotic mechanisms such as welding with robotic arms. It could increase productivity and accuracy but some might express concern as robots currently lack the power of a person's mind to make instant changes or decisions."

"Hard copies of documents and drawings could be replaced by the use of digital copies, BIM (Building Information Modeling) and VR. Not only are these methods more environmentally friendly, they are more effective and well-rounded for presentations, discussions and solution of issues.

- ↳ Type = Gravity Dam across river Kaveri .
- ↳ Construction Period = 1911 to 1931
- ↳ Height: 110.8 feet above river bed.
- ↳ Catchment area = 10619 sq.km
- ↳ Designed by MVisvesvaraya Chief Engineer KPWD.
- ↳ Design yield 1B9 TMC at 90% dependability.
- ↳ Full Reservoir Level (FRL) 124.8 Feet*
- ↳ Length of the Dam 8597 Feet.
- ↳ Number of Sluice Gate 152.

ENGINEERING FACTS

- Construction Period : 1952-1956
- Architectural style: Neo-Doric
- Architect - Kengal Hanumappa
- Largest legislative building in India.
- Floor count, 4 + 1 basement. Floor area, 505,505 square feet (46,963.0 m²).
- The grand edifice has 500 rooms apart from 2 assembly chambers. It measures 700Mx350M. The central dome of the building is 60 feet in diameter and is supported by 8 pillars.

REPORT OF WEBINAR ON "ENTREPRENEURIAL MINDSET - TRICKS AND TIPS TO GET INDUSTRY READY"

A webinar session was arranged for the final year students on the topic opportunities in construction industry for civil engineering professional.

Speaker;Satadru Chowdhury from Vaanahaa

Date: 09-11-2020

Time: 2.30 pm

Coordinator: Mr. Puneeth Kumar Asst professor

Convener: Dr. Baswaraj Kori HOD civil

The course content delivered in webinar is as follows

The impact of recent technologies in construction industry and entrepreneurial readiness of industry were discussed in this session.

The Speaker of the Session of Mr. Satadru Chowdhury presented the keynote address on “Introduction to Tricks And Tips To Get Industry Ready”. He discussed the basic concepts used in the technology relating with best suitable real life examples which are essential for the understanding of technology. He projected a clear understanding of the importance of intelligent robots and future problems in the real world. This programme is arranged in the motive of sharing the knowledge and practical experience of Mr. Satadru Chowdhury , who has a long years of experience in Entrepreneurship and industry ready concepts. The overall organization and deliverance of the webinar was helpful and satisfied the participants.

Seminar Report

On

Software Project Life Cycle

SDLC, Software Development Life Cycle is a process used by software industry to design, develop and test high quality software's. The SDLC aims to produce a high quality software that meets or exceeds customer expectations, reaches completion within times and cost estimates.

SDLC is the acronym of Software Development Life Cycle.

It is also called as Software development process.

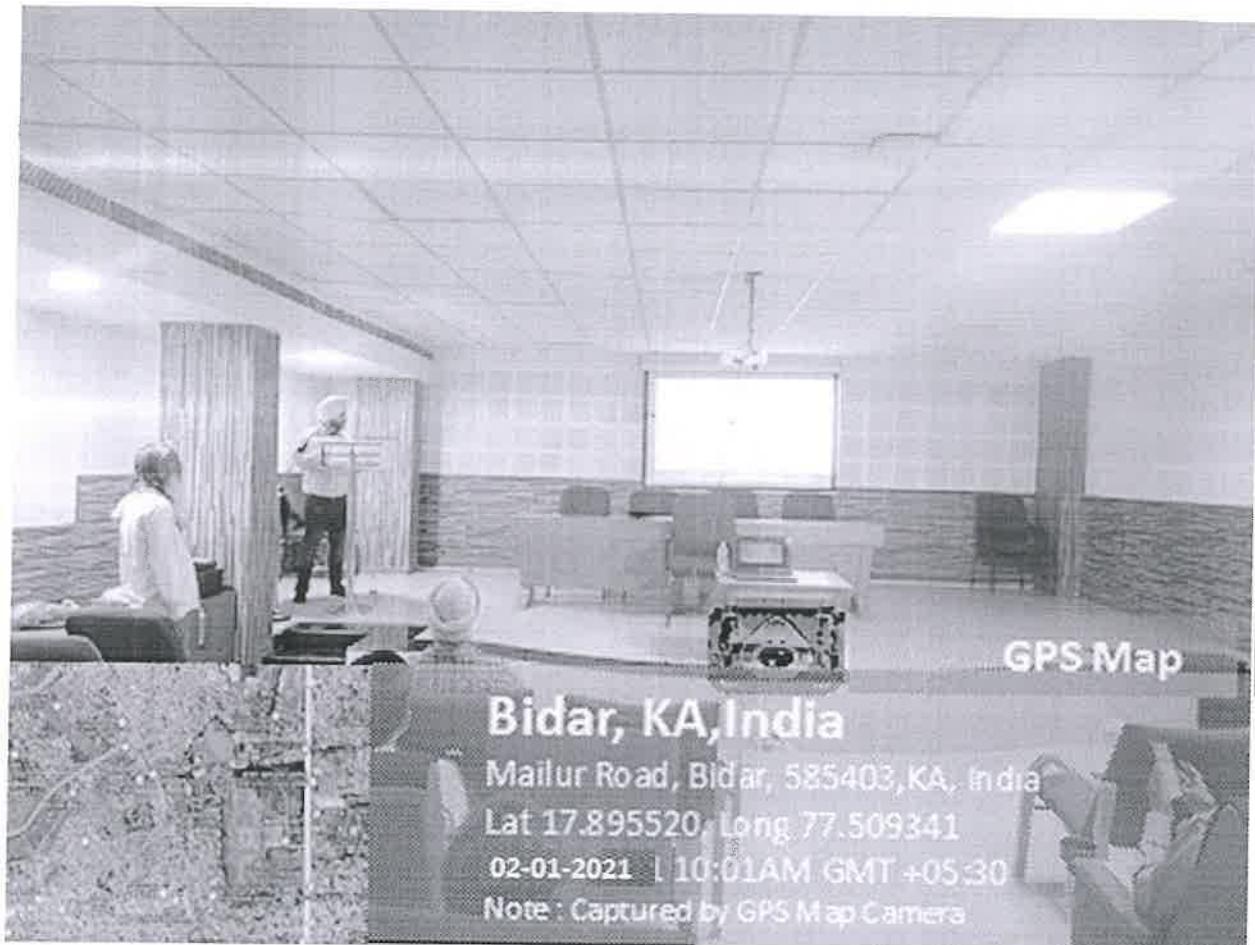

The software development life cycle (SDLC) is a framework defining tasks performed at each step in the software development process.

ISO/IEC 12207 is an international standard for software life-cycle processes. It aims to be the standard that defines all the tasks required for developing and maintaining software.

SDLC is a process followed for a software project, within a software organization. It consists of a detailed plan describing how to develop, maintain, replace and alter or enhance specific software. The life cycle defines a methodology for improving the quality of software and the overall development process.
